TH3
TOOL HOLDERS 3rd GENERATION

REMARKABLE COLLECTION

We are proud to present the 3rd generation collection created in a modern design with smart solutions and rich in unique equipment.

Makita products have been optimized thanks to new technologies and solutions applied.

All products can be joined together with other elements providing two-in-one, three-in-one or even all-in-one systems. The Makita range is the perfect choice when it comes to storing and carrying tools.

This catalogue is exclusively for the internal use of Makita colleagues and replaces all previous collections

Technical Solutions:

Strap Belt System with quick release buckles at the ends can be easily detached from the Tool Bags and worn on the waist as a light-duty tool belt. Fits all Tool Pouches and Holders as well as Tool Organizers.

Heavy-Load Support System provides additional support for Super Heavyweight Tool Belt and Set by distributing weight between waist and shoulders. Comfortable to wear and reducing stress through the working day thanks to extra thick 20mm cushioning.

Tool Loops System is an innovative plastic tool rail. Allows user to place different tools in loops without adjusting. High quality material ensures long-lasting quality and durability. Combination of different sizes of loops, single or twin row system lets you easily place bigger or smaller tools into the right loops.

Backpack Carrying System keeps shoulder straps of your backpack securely in place, and keeps your hands free. It's designed to shift the pressure and reduces fatigue on your shoulders. Includes a slide lock so it can be adjusted quickly.

Waterproof Bottom is a high quality solution for tool bags – rigid, wear-resistant and waterproof it keeps tools dry and protected from damp and wet surfaces. The reinforced plastic base also helps you to keep your tool bag clean.

Anti-Slip Solution minimises or even avoids workplace slip and fall accidents. The high quality polypropylene tape has a rubbery surface which helps to keep you tools in place and provides additional protection to help prolong the life of your products.

3L Technology is a unique 3-layer combination of polyesters and foam that provides extra cushioning. Designed to be tough and weatherproof, these amazingly light polypropylene panels are made up of three composite layers joined securely in a desirable configuration. The innovative feature of these structured core panels means that they can be formed into any shape.

Real Leather is smooth on the outside with brushed suede on the inside. Strong and tough for a long life but soft and supple enough for lasting comfort, whilst providing excellent strength with added abrasion resistance. Heavy gauge leather has been selected for use in products requiring a thicker covering - 1.8 to 2.0mm - ensuring a top quality product.

Durable Riveting gives truly unbreakable strength. Strong one piece self-punching rivets with washers used in all high stress areas. Washers for greater strength in strategical places are used on one or both sides, up and down.

Loop-Clip Solution is an innovative system thanks to which, each pouch can be easily but securely attached to your belt. Unique locking system protects item from fall out when system is not attached correctly. Locking and unlocking has never been so easy.

Elastic Loops secures the contents and keeps your tools in place while carrying. It provides great flexibility for organizing your tools and accessories. Elastic Loops have been applied to a wide variety of our products to ensure that you get maximum usage from your kit. The loops are able to adapt to perfectly suit all tools and accessories.

Side-Gate Solution lets you easily put the tool in without looking at the holder. An additional swing feature ensures your tool is kept at a comfortable angle. Made of stainless steel for product longevity and fixed by four rivets for extra strength.

Belt Loop Holder is a heavy-duty combination of steel D-ring with strong polyester tape to hang anything with carabiner. It keeps the item secure, allowing your pocket to be free for other accessories. Belt loop holder solidly slides onto the belt and stays there. You can use as many loops as needed - handy to hook on small accessories, knives and keys.

Rail Guide System is an extremely flexible organizational system in your case. A perfect combination of plastic side rails and light separating walls allowing the customisation of individual compartments. The separating walls are made of Triplex - an amazingly light polypropylene of 3 layer structured core panels. Each separator can be moved along rails assembled on side walls.

The background of the entire page is a close-up photograph of a woven fabric. A blue fabric strip is visible on the left side, while the rest of the image shows a black fabric with a fine, grid-like weave. Several silver-colored metal rivets are visible, securing the fabric layers together. The lighting is dramatic, highlighting the textures of the materials.

TOOLS NEVER FALL OUT

ANTI SLIP

Revolutionary Technology

Anti-Slip Technology is designed to hold any kinds of tools and accessories with its super sticky and anti-slip ability. It has the capability to grip tightly without sliding or slipping. Anti-Slip Technology minimises or even avoids workplace slip and fall accidents. High quality polypropylene tape with rubbery surface on top keeps your tools in place making it very durable to use in any condition. The material is also odorless.

Products containing Anti-Slip Technology

Anti-Slip Technology is used on all friction points on the pocket edges as the perfect protection from accidental falls. An additional feature of this tape is it's stiffness which allows the product to retain it's shape and toughness and therefore maintain the life span of the item.

PENCIL DRIVER HOLSTER UNIVERSAL L/R HANDED

E-05103

- Frees your hands so you can move safely on ladders, roofs, and scaffolding

REAL LEATHER

Real Leather

Smooth on the outside with brushed suede on the inside. Strong and tough for a long life, but soft and supple for comfort. Premium top grain cow hides tanned with a special blend of oils and waxes that meet the demands of heavy use in all the elements.

Always where it's needed

Excellent strength and added abrasion resistance, selected for use in products requiring thick leather for special tool slots. A heavy gauge leather with a thickness of 1,8 to 2,0 mm ensuring top quality. Used in hard-use areas to protect against damage by sharp tools: chisel, knife, screwdriver etc.

TIMELESS LEATHER LASTING QUALITY

Tools not included

Durable Riveting

Gives truly unbreakable strength. Rivets fasten together two or more pieces of material of varying thickness giving the ultimate strength for some of the toughest jobs. This also serves to reinforce the stitching and provides last quality in all products exposed to heavy weight.

Stainless Steel Rivets

Strong one piece self-punching rivets with washers used in all high stress product areas. Made of stainless steel to ensure solid protection and serve you for years. Washers for greater strength in strategical places are used on one or both sides.

EXTRA RIVETING MAKES A REAL DIFFERENCE

TAPE MEASURE HOLDER

E-05278

- Adjustable and easy to use tape measure holder
- Especially designed pocket with holes to measure without taking the tape out
